## SUMMARY

Highly-motivated employee with desire to take on new challenges. Strong work ethic, adaptability and exceptional interpersonal skills. Adept at working effectively unsupervised and quickly mastering new skills. Let's move the web forward together!

## SKILLS

- Typescript / Javascript
- CSS / Tailwind
- React JS
- Express JS
- Next JS
- Golang
- Powershell / Bash
- MYSQL

## EXPERIENCE

Data Migration Engineer, Relativity, September 2020-November 2022  
Chicago, IL

- Developed and implemented engineering strategies to improve production efficiency.
- Identified customer needs and developed solutions based on user feedback.
- Analyzed customer requirements to determine project scope and objectives.
- Evaluated existing processes and technology solutions for improvement opportunities.
- Performed calculations and simulations to analyze performance data.
- Participated in team meetings to discuss project progress updates.

Data Migration Engineer, Verqu, January 2019-August 2020  
Raritan, NJ

- Generated technical reports for customers.
- Performed testing to determine functionality or optimization.
- Communicated with clients and coworkers about analysis results.
- Maintained accurate records of service calls in a database system.
- Performed basic network troubleshooting and maintenance activities.
- Diagnosed issues with existing computer systems and identified solutions to resolve them.
- Developed user documentation such as instructions manuals for clients' use.

## ACCOMPLISHMENTS

- Built an application for monitoring migrations from different accounts across geo regions in realtime. Built with Express JS, Powershell and React. This allowed engineers to monitor accounts from a distance vs having to login into numerous machines for updates.

- Developed a solution at Relativity to increase performance of our data migration tool to process from 200 GB a day to over 2TB a day. Nearly a 1000% increase in performance. This led to 2 quarterly employee standout spotlights.
- Created an alerting system which would notify engineers when migrations would hang.
- Built automated reporting which would run migration and chain of custody reports then send them to our clients saving our team numerous hours a week of client meetings.
